## **DETAILED ACTION**

### ***Priority***

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Specification***

The disclosure is objected to because of the following informalities:

On page 7, line 14, change "are" to --can--,

On page 8, line 19, add --be--between "to remarkably".

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000.

Art Unit: 3749

Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

**Claim 1** is rejected under 35 U.S.C. 102(e) as being anticipated by **Oda et al (6,450,805)**. **Oda et al** discloses a baking apparatus (41) for use with semiconductor wafers, and includes a chamber with an upper part (64) and a hot plate (70), a cover (63) with an inner surface facing the hot plate, wherein a chill plate (93) is extended into the apparatus (41) in which case a black plate (96) which can be coated with a film (SEE column 5, lines 62-67) is extended over the inner surface of the cover and performs cooling, lowering the temperature inherently providing temperature uniformity in the chamber.

***Allowable Subject Matter***

**Claims 2-5** are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
